

COVID-19 Updates

Situation in Maldives

Yet there is no confirmed case of COVID-19 in the Maldives. Since there is no case seen in the Maldives the government of Maldives is working at the risk level white. The measures taken at level white are:

- Spreads awareness among the community on the disease
- Train the relative organization and be at alert of any situation.
- Identify isolation facilities for suspect case and identify quarantine facilities for confirmed cases and keep the places ready for any upcoming situation.
- Stockpile the medicine and other equipment required to treat the people with the disease.

Also the government of Maldives has taken further action as the preventive measures. This include

1. A drill was conducted to analyze how much the organizations are prepared for any case of COVID-19 in Maldives, and further discussion was carried out on the loop holes identified during the drill.
2. All the international ports in the Maldives have started screening the arrivals for COVID-19. And all the cruise liners arriving have being hold temporarily.
3. Arrival restriction has been announced for some countries including China, Iran and areas from South Korea where red alert has been announced.
4. Awareness activities have been conducted throughout the country. The awareness has been provided to more than 77,319 people throughout the Maldives. Yesterday, through awareness to the COVID-19 in male, awareness session were conducted to more than 100 MPL staff yesterday. And Zoom session was conducted among 15 health professional working in IGMH.
5. Till yesterday more than 185,170 people were screened in the port for COVID- 19 symptoms.

Situation Globally

More than 93130 confirmed cases of COVID-19 have been reported globally. In China 80,270 confirmed cases have being reported. Furthermore 10,780 confirmed COVID-19 cared being reported from other countries. In china 124 new cases being reported with in the last 24 hours. The deaths of COVID 19 have risen to 3,200 and within 24 hours 83 people died from COVID 19 though out the world. More than 83 countries/ territories have being effected with COVID-19. Despite the increased number of cases in the countries, more than 50,681 have cured from COVID-19.

Some preventive measures for COVID-19

- Wash your hand with soap and water regularly.
- Cover your nose and mouth with your elbow or with a tissue while coughing and sneezing. And throw the tissue to the closed bin.
